HIRWAPORTFOLIO — UI/UX DESIGN DOCUMENT

IDENTITY AND PROJECT CONCEPT

My name is Hirwa Honorine.

Registration Number: 25/28159
Verification Code: MOB-A2-8159
Application Name: HirwaPortfolio
Platform: Android
Technologies: React Native, Expo, TypeScript

1. 1 Project Concept

HirwaPortfolio is a personal portfolio mobile application designed to present my education, skills, projects, and professional profile in one place.

1. 2 Purpose

The application allows visitors to explore my skills and projects, view project details, and learn about my professional interests. It also allows me to update my profile information and profile image.

1. 3 Target Users

The target users are collegue, lecturers, potential collaborators, and anyone interested .

1. 4 Main Features

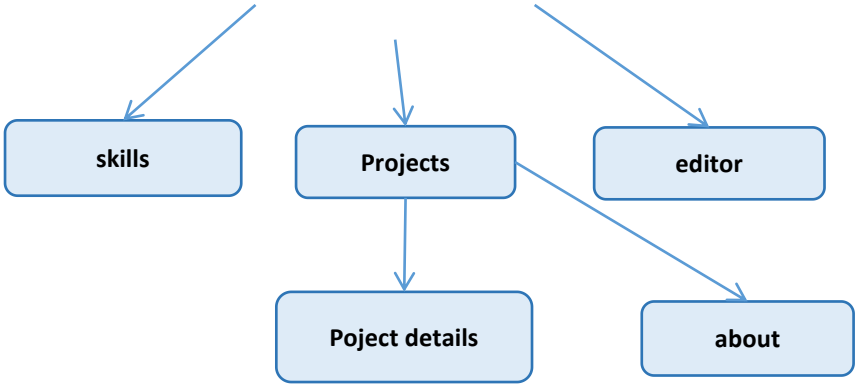

Home screen introducing me and my professional interests,Skills screen displaying my technical skills and education summary,Projects screen displaying my projects,Project Details screen explaining each project's problem, contribution, and technologies.Editor screen for updating profile information.Profile image selection and preview.Local profile data persistence.About screen containing application and student details.Offline access to core portfolio features.

USER FLOW AND NAVIGATION

2. 1 User Flow

The application uses five main bottom-navigation tabs: Home, Skills, Projects, Editor, and About. Project Details opens from a project selected on the Projects screen.

2. 2 Navigation Description

Home: Introduces me and displays the required identity sentence.

Skills: Displays my technical skills and education summary.

Projects: Shows my projects, including Agri Market and Mwiza Kids Wear.

Project Details: Displays detailed information about a selected project. The Android Back action returns the user to the Projects list.

Editor: Allows profile information to be updated and saved after validation.

About: Displays the application name, student name, registration number, verification code, version, and data-use statement.

2. 3 Navigation Goals

The navigation is designed to be simple and consistent. Users should be able to reach the main sections easily, understand where they are, and return from project details without losing their place in the Projects list.

WIREFRAMES — HOME AND SKILLS

PORTFOLIO

COMPUTER SCIENCE STUDENT

My name is Hirwa Honorine.

INES–Ruhengeri · Software Engineering

Aspiring Software Developer | Web Development & AI Enthusiast

I am a Computer Science student at INES–Ruhengeri who enjoys turning ideas into simple websites. I have worked on Agri Market and Mwiza Kids Wear, and I am continuing to improve my web development skills. I also use AI tools to support my work, then review and edit the results.

Learning & building

A little about me

01 / INTRO

I enjoy turning ideas into practical digital experiences. I learn by building websites, testing what works, and improving my code step by step.

Curious learner | Practical projects | AI–assisted workflow

My journey so far

02 / SNAPSHOT

02	05	01
Personal projects	Skills in focus	Goal: keep growing

Home | Skills | Projects | Edit profile | About

Annotations:

The required identity sentence is placed near the top of the screen.

The headline communicates my professional direction.

The profile image supports personal identification.

The introduction gives visitors a brief overview of my interests.

The bottom navigation provides access to the five main sections.

3.2 Skills Screen Wireframe

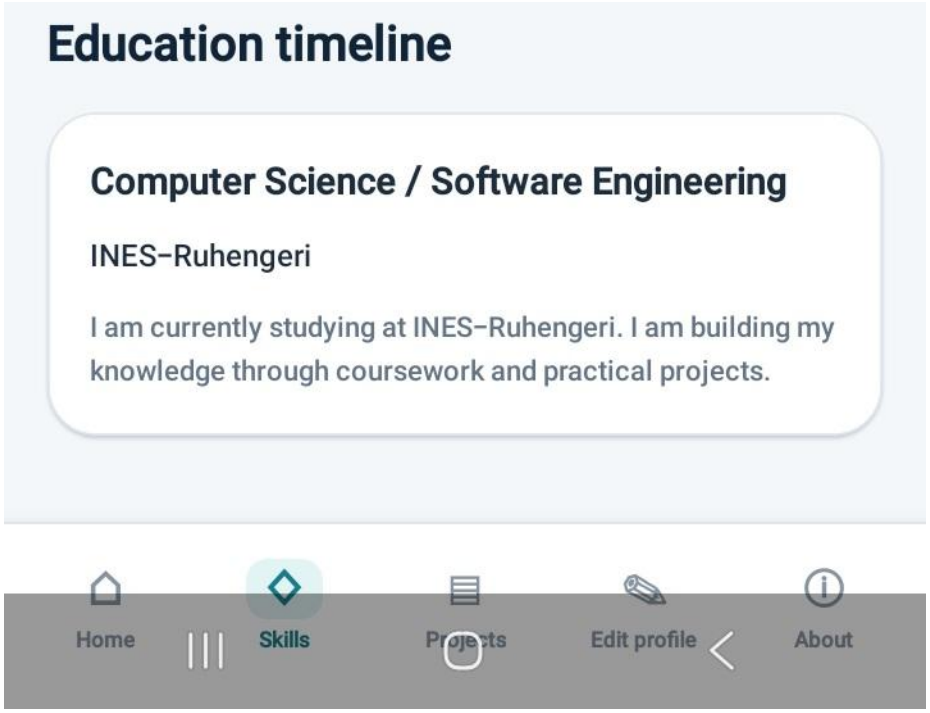

Annotations:

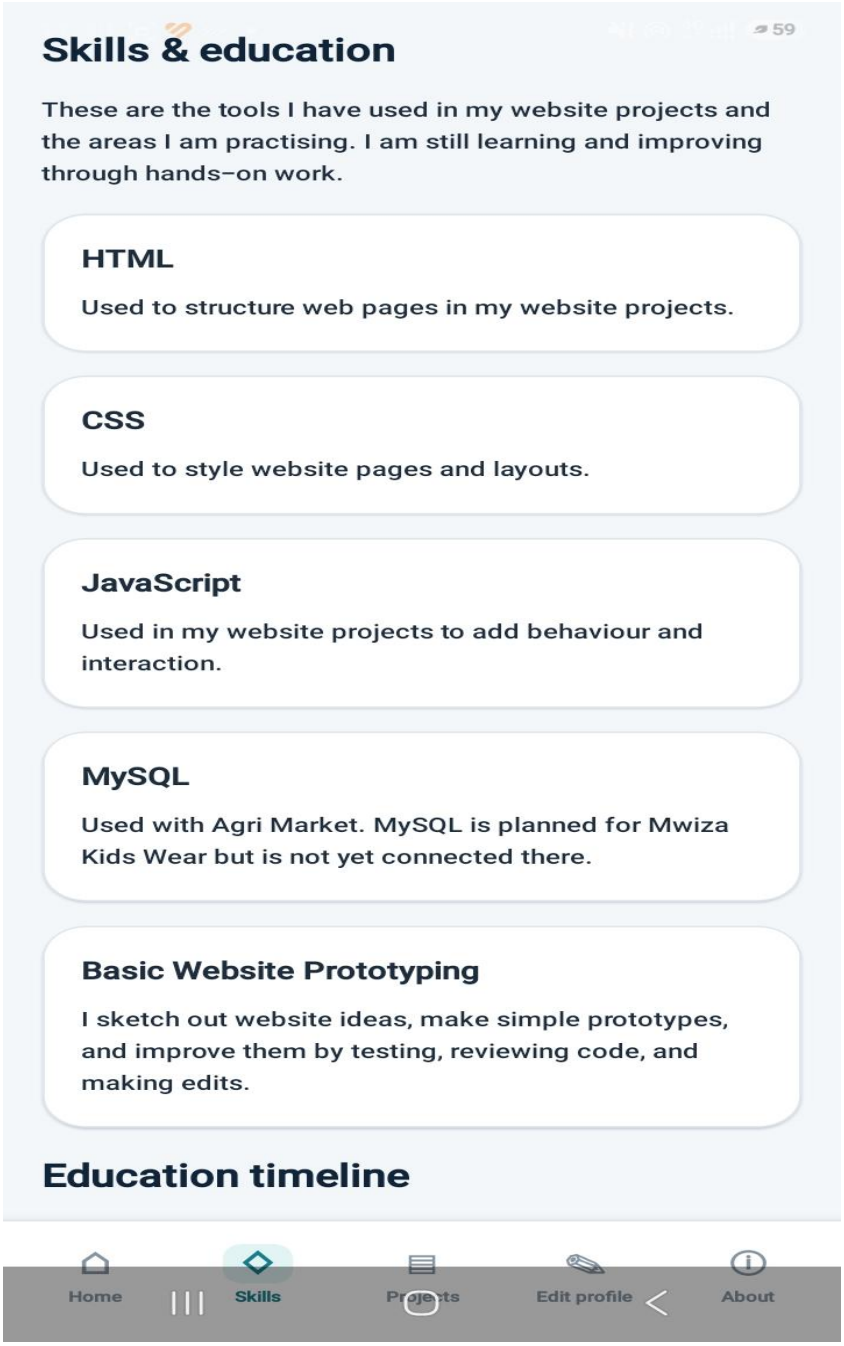

Skills are displayed as separate items for easy reading.

The education section provides academic context.

Consistent spacing improves readability.

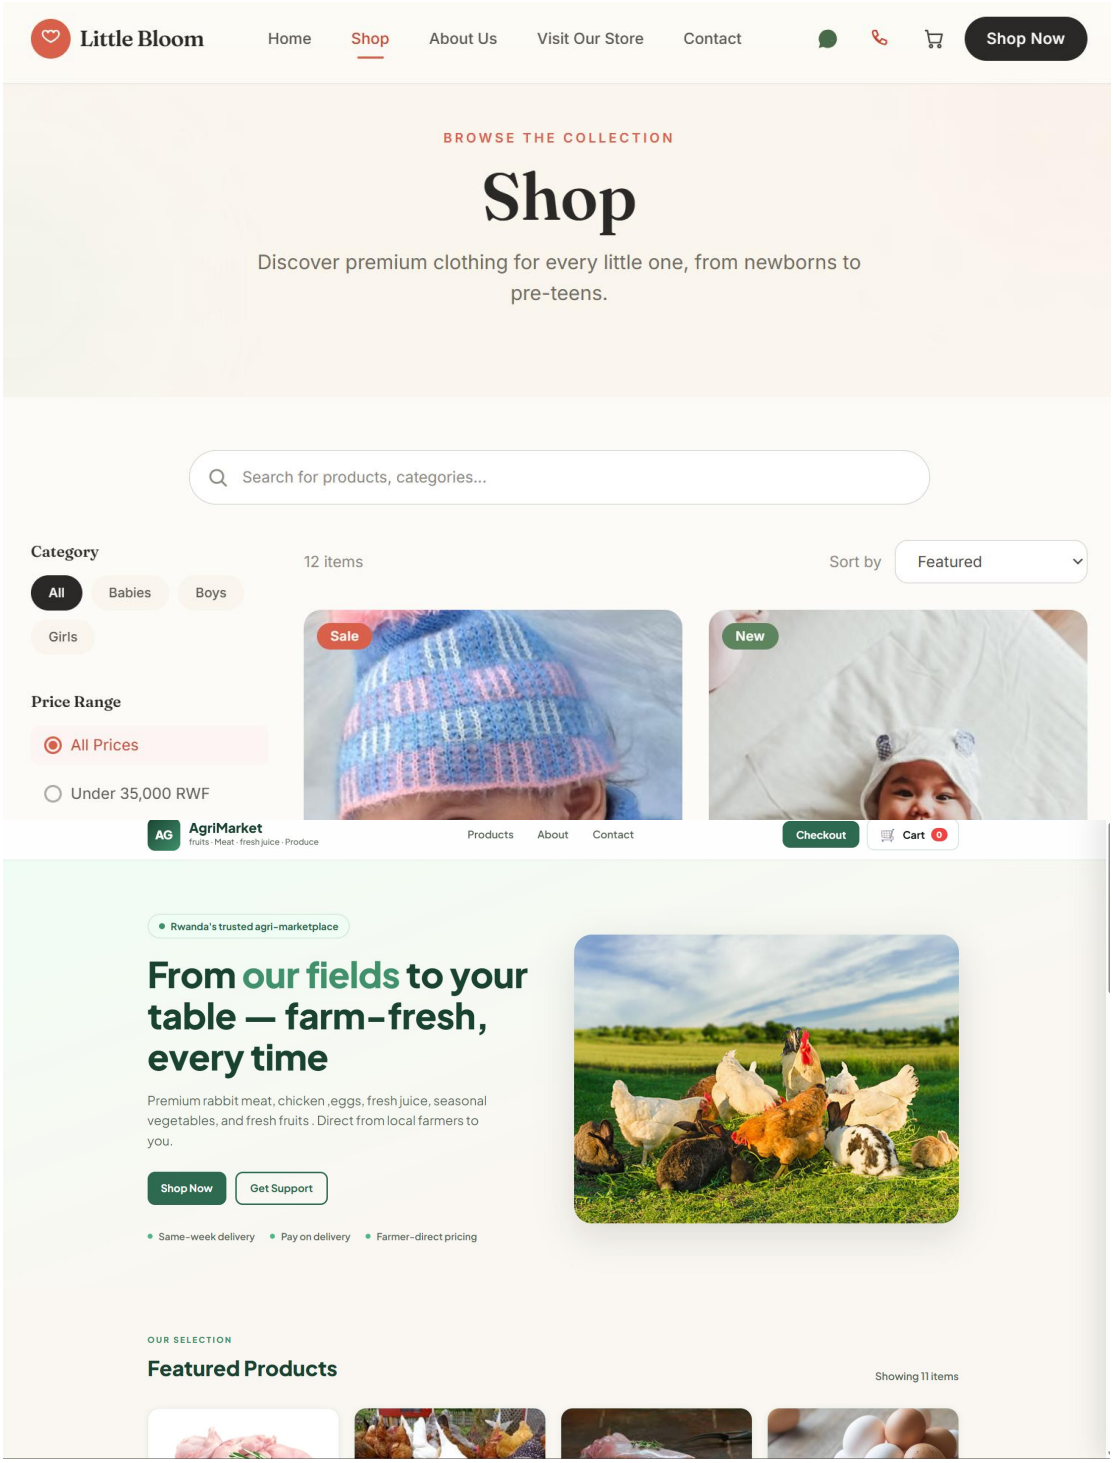

The same bottom navigation is used across the main screens.

WIREFRAMES — PROJECTS AND EDITOR

The following are the project I was trying to be working on. The first one not done yet , but the second one almost done.

4. 2 **Project Details Screen**

Agri Market: A website prototype for customers to browse farm products, add products to a cart, and arrange delivery. The intended product range includes vegetables, juice, fresh meat, and live domestic animals.

Mwiza Kids Wear: A children's clothing shop prototype that allows customers to browse clothes, add items to a cart, and consider delivery or visiting the store.

VISUAL DESIGN

5. 1 Visual Design

HirwaPortfolio uses a clean and professional interface. The design aims to make information easy to read and navigation easy to understand.

Proposed colour palette:

Deep Navy #183153: Used for headings and important text.

Teal #1F7A78: Used for primary buttons and highlights.

Soft Background #EEF4F8: Used for light backgrounds and cards.

Body Text #263445: Used for general text.

all screens.

5. 2 Privacy and Offline Use

Profile information and the selected local image reference are intended to be stored on the device. Camera and gallery permissions should be requested only when needed. If permission is denied or image selection is cancelled, the rest of the portfolio should remain usable.

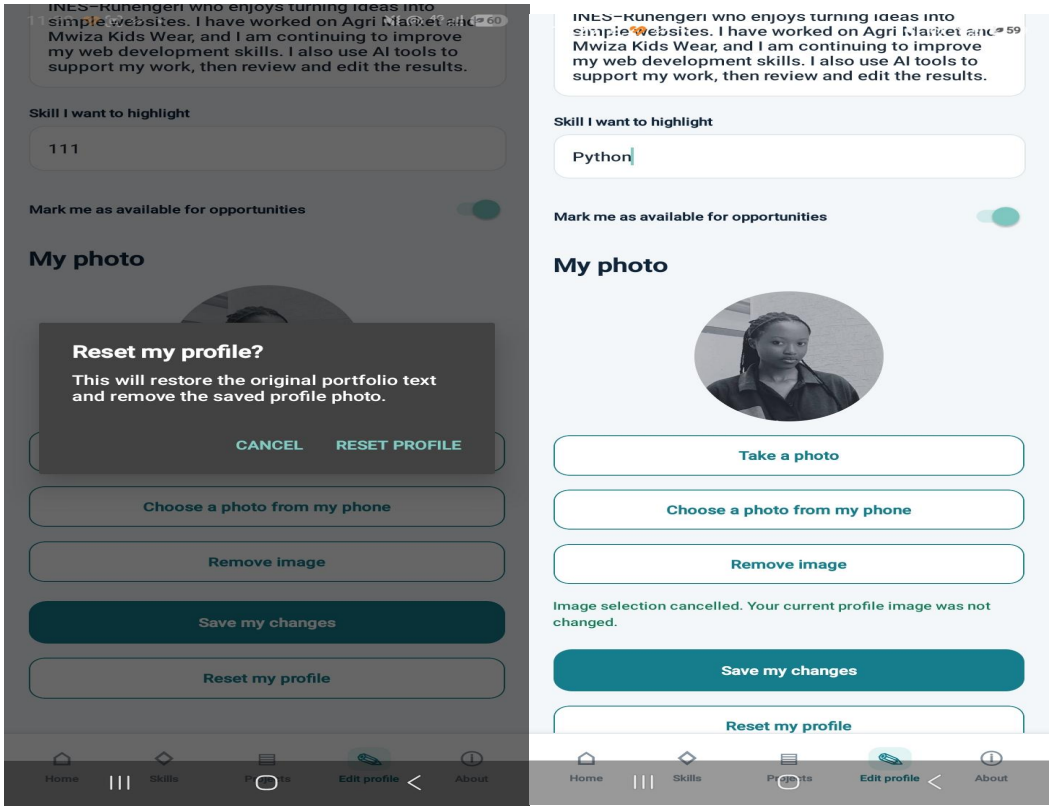

DESIGN REVIEW AND IMPLEMENTATION CHECK

6. 1 Purpose of the Review

The purpose of this review is to compare the proposed UI/UX design with the completed HirwaPortfolio application and identify any differences between the design and implementation.

6. 2 Screenshot Checklist

The following are the screenshot that show some changes during test

6. 4 **Conclusion**

HirwaPortfolio is designed to present my skills, education, projects, and professional interests through a simple mobile interface. The five-tab navigation, project details, profile editor, image handling, and local persistence support the main goals of the application.
